

# PERSPECTIVE MOBILE

*Get the lowdown every step of the way.*

Managing people and tracking their progress is one thing when they are in front of you. But what happens when they aren't? Once they are on the road and out of sight, you are left powerless in a situation that you cannot control. Or are you?

Perspective Mobile lets you track and monitor the location of your vehicles or personnel from the comfort of your office, or anywhere you choose. Through GPS technology and digital maps, you are empowered to observe their status and record their progress in real-time while they are on the move.

That way, you are armed with all the intelligence you need to ensure everything goes smoothly, as well as manage them effectively while they are in transit—all in one powerful tool.

## **Perspective Mobile is ideal for tracking and monitoring in the following areas:**

- Vehicle tracking
- Vehicle productivity monitoring
  - Geo-fencing
  - Speed monitoring
  - Fuel monitoring

## **Key features of Perspective Mobile include:**

- Ability to track and monitor vehicles / assets
- Record and trace route history
- Geo-fencing – tracking assets to conform on specific boundary set
- Others: (varies on device installed)
  - Real time location display with route variation or over speed warnings
  - Fuel usage & tamper alerts
  - Remote disabling
  - Reduced vehicle downtime
  - Improved security or protection of high value passengers and commodities
